PROJECTS

➤ **Tire Shop Management System-Desktop Application (2nd year project)**

This system is developed to help manage the orders, payment, Employee salary Management, Employee Registration, Customer Registration & loyalty point management and Inventory and distribution. In this system, users have to enter the data once and then it gets linked with all files. This reduces the workload of the user and it is also a time-saving process. Users can easily retrieve data in the system and this system maintains all records easily.
Technologies-Java, MySQL, iReport

➤ **Health App-Android Application**

This is my 2nd year 2nd semester Android project. I worked as the leader of a 4-member team. This app includes an alarm and notification system for water and food, BMI calculator, Sugar Level checker and Heart rate sensor.
Technologies-Java, SQLite, Android

➤ **Online Jewelry Shop System-Web Application**

This is my 1st year 2nd semester Project. This project includes shopping cart, Adding new jewelry items and Customer Login registration.
Technologies -PHP, HTML/CSS, JavaScript, MySQL
